

Blood Lead Level and Exceedance Trends for Alaskan Children <18 years old (1995-2012)

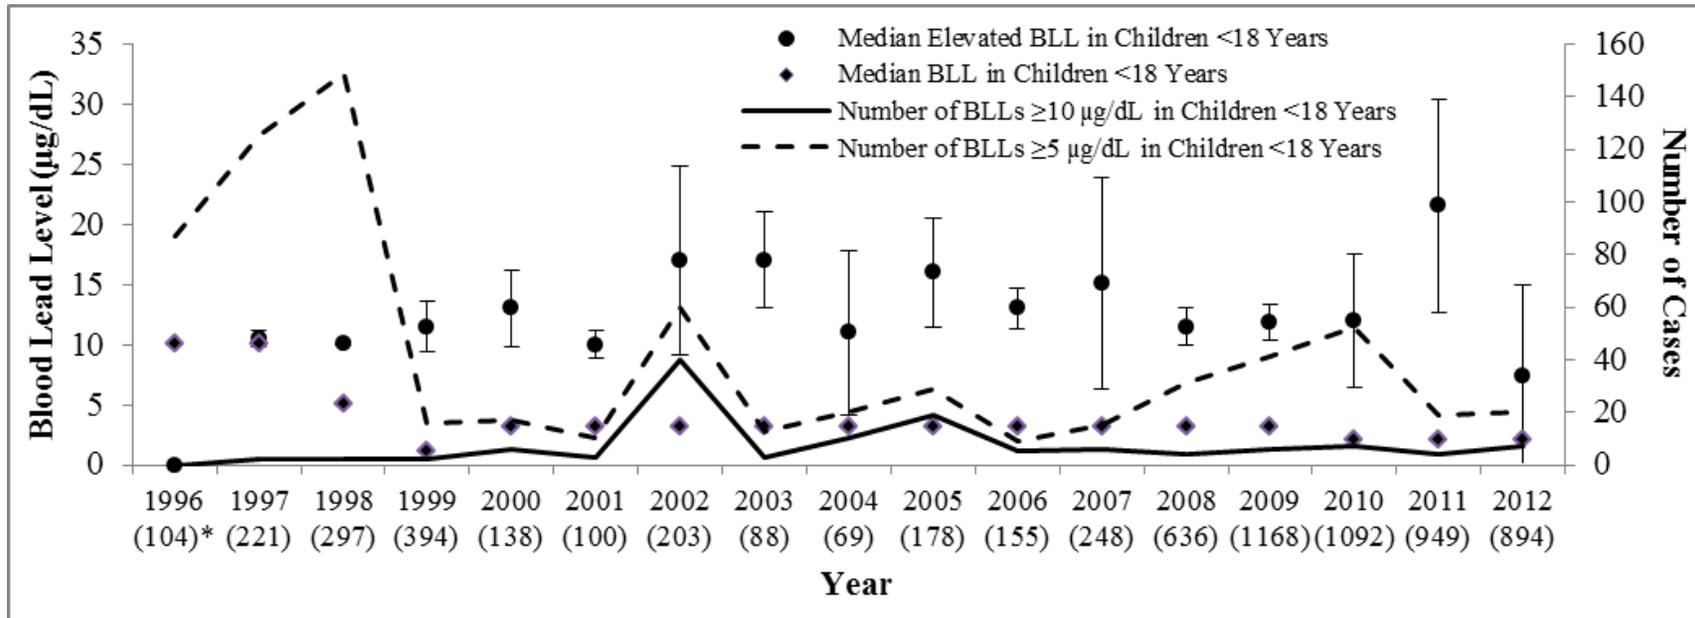

Figure shows annual blood lead level (BLL) medians for the period 1996 through 2012. It also shows elevated blood lead level medians and numbers of blood lead level exceedances of the 10 µg/dL CDC level of concern (pre-May 2012) and of the 5 µg/dL CDC reference level (post-May 2012).

*Numbers in parentheses on x-axis denote total number of blood lead test results reported to the Section of Epidemiology.
